DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The claimed invention is a semiconductor memory array comprising:

A plurality of memory cells arranged in a matrix of rows and columns, the plurality of memory cells include a first memory cell and a second memory cell, wherein the first and second memory cells each include at least a transistor to constitute the memory cell and wherein the transistor includes:

- A source region;
- A drain region;
- A body region disposed between the source region and the drain region, wherein the body region is electrically floating; and
- A gate spaced apart from, and capacitively coupled to, the body region; and wherein each memory cell includes:
 - A first data state representative of a first charge in the body region; and
 - A second data state representative of a second charge in the body region wherein the second charge is substantially provided by removing charge from the body region through the source region; and wherein the source region of the transistor of the first memory cell and the source region of the transistor of the second memory cell are the same region.

The prior art of record does not disclose or suggest either in singly or in combination the following limitations and other elements in the claims:

Reference Hu et al. (US 5,448,513) do not disclose the claimed operating states and removing charge from the body region.

Reference Kanamori (US 6,151,254) do not disclose the claimed operating states and removing charge from the body region.

Therefore, the above references do not disclose the claimed invention of present application and claims 28-64 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
